

Product Description

For decades, our 28 Series floor register has reigned supreme as the most demanded item among grilles, registers, and diffusers for residential use. Now, we have added a new twist—actually several new twists—the twists and turns of a textured finish.

The new Series is dubbed 28PC, indicative of the Powder Coat finish. This finish is comparable to our standard electrocoat finish in terms of durability while adding the visual and tactile elements of texture. In conjunction with the rolled-edge face blades, it's a barefoot experience your customers can enjoy!

We have carried over all of the patented design elements and quality of our standard product. So, when your next residential project requires that distinctive touch, ask for the 28PC by Continental.
