

## American Reinvestment & Recovery Act (ARRA)

The Stimulus Bill. The Recovery Act. ARRA. All of these names fit the American Reinvestment and Recovery Act designed to offer funding assistance for public works and public facilities projects. For decades, we have helped public facilities achieve phenomenal levels of comfort, air quality and energy-efficiency through means of air distribution products and venting systems.

Our dealer network is accustomed to taking our products; installing and maintaining systems that achieve the above desired results. They have the resources to ensure you meet the ARRA documentation requirements. They are located in your neighbor hood, all across the nation. And, they have experience with a variety of public buildings including the following:

- Schools (K-12)
- Colleges & Universities
- Municipal buildings
- Hospitals
- Military bases
- Museums
- Local, State & Federal office buildings.

When you are ready to move ahead on the HVAC air distribution or venting system of your ARRA project, look up one of our dealers who can supply you with the Continental grilles, registers and diffusers and AirJet venting products needed for your project.

### Did someone Say “Buy American”

That’s right. Section 1605 of the American Reinvestment and Recovery Act specifies that, for public building projects which use ARRA funds, all manufactured goods for these projects must be produced in the United States. Continental Industries can help you satisfy this requirement through exclusive manufacturing In the U.S.A. For documented evidence, [consult this document](#).
